	<p>This Coronavirus was a new illness in 2020. Lots of doctors have spent a long time learning about it and know more about it now.</p>
	<p>Coronavirus can affect people differently depending on a lot of reasons.</p>
	<p>Some people do not know when they have Coronavirus.</p>
	<p>Some people get a little bit ill when they have Coronavirus and can take care of themselves at home with help from their household.</p>
	<p>Some people get very ill when they have Coronavirus and need help from the hospital to get better.</p>

Sadly, some people that do go to hospital can pass away.

Doctors have been working hard to find more medicine to help people who need to go to hospital get better.

It is important to keep following advice from the government to try and stop catching Coronavirus.

We should all wash our hands often for 20 seconds.

We should all keep 2 metres apart from people we do not live with when possible.

	<p>If we can, wearing a face covering when we need to public places can help keep everybody safe.</p>
	<p>Some people are choosing to have a vaccine to help stopping Coronavirus making them very ill.</p>
	<p>At Silva Care staff are wearing PPE to help keep everybody safe.</p>
	<p>At Silva Care staff are working very hard to make sure that buildings are extra clean.</p>
	<p>It is okay to feel worried sometimes but talking to staff or someone we trust can help us feel better!</p>
